## Bulk Attachments Download

Introduction

The Bulk Attachment Download tool will save you time and effort by allowing you to download Customer, Site and Job items all in one place.

This guide will show you how to download your attachments in bulk, in a couple of easy steps.

Accessing the app

Click My Apps

Either Search for 'Bulk Attachments Download', or simply click the button.

Bulk downloading your Attachments

Use the search filters to find your Customer

You can also use further filters if required, such as Site, Job or dates, and then click Search

You'll then see a list of attachments for this Customer, based on those filters. I.e. if you only filtered by Customer, you'll see your Customer attachments, whereas if you want to filter it down further, you can select a Site filter, and you'll also see the Site attachments too.

Click Download All to download a Zip file of the attachments.
